EXAMINER'S AMENDMENT

Following entry the amendment filed 9/3/2003, the claims 5-18 are pending.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark Deluca on 12/09/2003.

2. The application has been amended as follows:

In claim 16, line 1, delete " the selected support" and substitute therefore – the selected surface ---.

3. The following is an examiner's statement of reasons for allowance:

Concerning claims 5-18, no prior art has been found teaching or suggesting the system and the kit for quantifying molecules expressing a selected epitope comprising a selected surface on which a molecule expressing a selected epitope is or can be immobilized, an epitope detector of a single chain Fv for the selected epitope or a constrained epitope specific CDR either or which have been modified to allow the attachment of oligonucleotides and an oligonucleotide attached to the single chain Fv or the constrained epitope specific CDR and the oligonucleotide comprising an RNA promoter linked to a nucleotide sequence that is template for an RNA transcript.

The closest prior art is the reference of Eberwine et al. (5,922,553, issued July 13, 1999). Eberwine et al. disclose using labeled RNA to determine the amount of selected protein present

in small amount (See column 4, lines 34-39). The method applies antibody targeted, which is immobilized to a solid support. The solid support is then contacted with a RNA-promoter driven cDNA sequence covalently coupled to a second antibody target to the selected protein. The amount of selected protein in the cell is determined by amplified RNA techniques. However, Ebervine et al. do not disclose the RNA-promoter driven cDNA sequence which is attached to the single chain Fv or the constrained epitope specific CDR in a system for quantifying molecule expressing a selected epitope.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is 703 (305) 7112. The examiner can normally be reached on Monday - Friday, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on 703 308 1119. The fax phone number for the organization where this application or proceeding is assigned is 703 (305) 3014.
